

H1

Family side · Guest side downstairs · Equal

The studio's recommended pairing: two living rooms that close or join, under three equal children's rooms.

- Ground floor = T2-A: the west bay is the family's (pantry → kitchen with island → family dining → family room on the terrace); the east bay is the guests' (vestibule, guest WC behind a 45° wall, a 45° portal, a closable 28 m² salon).
- One 4.4 m walnut folding screen on the column line: open for Christmas (one 55 m² room), closed for heavy cooking or guests.
- First floor = T2-B Equal thirds: one suite door, closed his and hers dressings, walk-in shower room, king bedroom; the suite lounge with its own shower and landing door.
- 45° kids' gallery and a Jack-and-Jill bath with a door from each kids room: every child ends with ≈ 16–18 m² and their own bathroom door.
- Every room reached with a door-width clear path; nobody crosses a bedroom to reach another.

What it takes from where

- Ground: T2-A Family side · Guest side, round 2.
- First: T2-B Equal thirds, round 2.
- The guest WC's outside door (T1-R2W) can be added on its east wall if the compound agrees.
