

H2

Your master downstairs · Equal thirds upst

The calmest hybrid: your master plan's ground floor as developed in round 3, under the equal-thirds first floor.

- Ground floor = Track 1 round 3: kitchen with the street window and a 3-stool island, 45° glass vestibule, TV living + garden lounge, dining between the movable glass walls, under-stair store.
- Your guest WC idea built in: an inside door from the vestibule and an outside door to the side yard for garden days.
- First floor = T2-B Equal thirds (round 2): one suite door, his and hers as two closed dressing rooms, walk-in shower room on the W1 stack, king bedroom.
- A 45° kids' gallery and a Jack-and-Jill bath with a door from each kids room: at stage 3 every child has ≈ 16–18 m² and their own bathroom door, the suite lounge included.
- Least building risk of the hybrids downstairs (it is your drawing, developed); one off-stack drain upstairs to confirm on site.

What it takes from where

– Ground: T1-R3 (master developed, round 3) + the guest-WC outside door from T1-R2W.

– First: T2-B Equal thirds, round 2 (closed his dressing, movement fixes).
