

H3

Folded suite · equal kids

T2-D's folded walnut house downstairs and in the suite, T2-B's equal-thirds kids wing upstairs: drama for the couple, fairness for the children.

- Front door: a curved glass vestibule frames the garden; a walnut pivot wall closes the whole kitchen, a curved half-wall wraps the round table, and the guest WC has a second door out through the garden store.
- One suite door at the top of the stair. Behind it a 45° walnut gallery folds to the bed, with pocket doors to the shower room, hers (4.2 m hanging + full mirror) and his own CLOSED dressing (3.1 m).
- Quarter-circle walk-in shower with no glass to clean, double basin and WC, all on the existing W1 stack.
- Equal thirds at stage 3: west room 16.0 m², east room 17.7 m², suite lounge 15.3 m². Each has a bathroom door inside the room, and the lounge keeps its own lockable landing door. No building work.
- Shared heart at the stair: kitchenette on the E1 wet wall, laundry with side-by-side machines, linen and a window, and a Christian prayer room with a 1.6 m icon wall facing east.
- Space out of nothing: a secret crawl loft over the kids bath joins the den over the west room's wardrobe, and suitcase lofts sit over both dressings.

What it takes from where

- Ground: all of T2-D (glass vestibule, pivot wall, curved dining wall, WC + garden store).
- Suite: T2-D's 45° fold and quarter-circle shower, re-cut so his dressing is a closed room.
- Kids wing: T2-B's 45° gallery, Jack-and-Jill bath (plus a day door) and west-room den.
- Heart: T2-B's kitchenette on E1, lounge shower and laundry; prayer room widened.
