

T1-R2W

Round 2 + guest WC with an outside door

Daniel's variant: the guest WC opens both to the vestibule and straight to the side yard, for garden and pool days.

- The east side window of the guest WC becomes a 0.8 m outside door onto the side yard, the path between the street and the garden.
- Garden guests, children playing outside and the gardener use the WC without walking through the house or the travertine floors.
- Inside door from the vestibule stays, so guests at a dinner still use it without going outside.
- Both doors lock from inside; the room is re-planned so neither door swings into the WC or the basin.
- Everything else is round 2.

Changes vs round 2

– Guest WC: east window replaced by an outside door (SIDE facade: needs the compound's approval, like the store door).

– WC moved to the street-side wall, basin to the hall-side wall; room stays 2.7 m².
