

H6-2

H6 · iteration 2 — prayer at the landing

H6 with the chapel moved to the top of the stair: its curved corner turns the landing toward the kids wing, so the master shower room and the kids bath can both take the west bay.

- Come up the stair and the little chapel is straight ahead at the end of the landing; its rounded corner sweeps you right, into a short passage and the kids wing door. The suite door stays where it was, at the other end of the landing.
- Master shower room is now 2.9 m across with the old round foyer as its entry: walk-in shower 1.8 m, WC on the west wall at the old drain, double basin, towel cupboard. The suite hall ends at the shower room door instead of in a dead end.
- Kids bath almost doubles (5.2 → 7.6 m²): bathtub, a separate shower, a double basin and the WC at the old W2 drain. Both kids rooms use it from the same little lobby.
- The kids wing is one door off the landing into a small square lobby with four doors: bath, double room, play room, and the way back out. No more 45° wall.
- The double room is a plain rectangle again, with a 2.7 m wardrobe tucked into the recess under the stair edge, twin beds with a shared bedside table, two desks.
- Everything else is H6: bedroom + lounge with the sliding wall, lounge shower room on E1 with its hidden door to the landing, laundry column + kitchenette, hers with the curve, his closed, play room with the den over the bath.

What changed from H6, and why

– Prayer room leaves the west bay. It is now an inner room on the landing, beside the stair and over the old kids-lobby corner: 1.7 × 2.3 m, bench for 3–4 on the west wall facing the icon on the east wall, candle stand; 4.9 → 3.4 m² (smaller than H6's, but no longer eating the two baths). Its north-west corner is a curve (radius 0.7 m) that turns the landing into the kids passage.

– Master shower room grows east into the old suite-hall end and round foyer (the dead end is gone): 5.7 → 7.6 m². It also grows south to Y −2.95 so the side window (Y −2.9…−2.1) now lights the shower instead of sitting on a partition.

– Kids bath grows north and east into the old prayer room's half of the bay: 5.2 → 7.6 m², with a tub AND a separate shower and a double basin. WC stays on the west wall at W2.

– Kids wing entrance: the 45° wall and angled door are gone; a 1.2 m passage runs from the landing past the chapel to one door; behind it is a 1.2 × 1.6 m lobby with a square door to each kids room and a pocket door to the bath.

– Double kids room: clean 4.7 × 3.25 m rectangle plus a wardrobe recess under the stair edge (2.7 m of hanging, back in its corner). 16.4 m². Twin beds are pulled 0.5 m south so the wardrobe doors open freely.

– Kids-lobby linen cupboard dropped (the lobby is now too small for it); the landing linen cupboard opposite the stair top stays.
