

F1-1

Daniel's plan, detailed — A (quiet)

Daniel's Rev 07 of 31 Oct, both floors, with its six open items resolved the quiet way: one-sided TV wall with a display face to the garden lounge, a proper 1.05 breakfast bar and a 1.0 × 1.5 island with real landings, a two-wall pantry with a worktop, a two-leaf pocket pair between bed and lounge, kids-bath clearances fixed and the tea-corner pinch opened.

- The curved TV wall now has one job per face: the TV and a 0.35 console on the east (concave) face for the sectional and the east-wall sofa; a walnut display shelf with plants on the west (convex) face, so the garden lounge's two half-moon chairs turn their backs to the wall and face the serpentine sofa and the terrace.
- The breakfast bar is a real bar: 1.05 high, 0.60 counter plus a 0.30 overhang on the dining side with three stools at 0.60 centres; the island shrinks to a clean 1.00 × 1.50 with the two-burner hob in the middle and 0.60 of landing each side, 1.05 clear to the sink run, and loses its two stools (the bar and tea corner seat seven).
- A four-leaf bifold closes the 1.17 m gap between the west wall and the bar's rounded end, folding back into the kitchen against the west wall where nothing stands.
- The pantry is designed, not sketched: 0.30 shelves on the two long walls leave a 0.68 aisle to a 0.40 worktop under the street window, behind a 0.80 four-leaf accordion door with the light on a door contact.
- Upstairs the bed and the lounge are divided by a 1.52 m two-leaf telescopic pocket pair (0.76 each) that disappears into the dressing-side wall by day — as wide as the wall between the dressing corner and the column allows.
- The kids bath keeps Daniel's tub-WC-basin layout with the WC centred 0.475 from the tub and the wall, 1.2 m in front of it, and a 1.30 trough basin with two taps; the door keeps its south hinge, which is the one that screens the WC as it opens.

Colour key

What changed vs F1 (and why)

- Living
- Kitchen / dining
- Parents
- Children
- Baths
- Service / storage
- Prayer
- Flexible room
- Circulation

– TV wall 0.20 thick (was 0.15), TV on the east face only, display shelf + plants on the west face; chairs turned to the sofa
– Breakfast bar: 0.30 overhang + 3 stools at 0.60 c-c; dining table 0.50 north so 0.75 stays behind its end chair
– Island 1.00 × 1.50, hob centred, 1.05 aisle to the sink run, island stools dropped; bifold recalled
– Pantry: shelves on two walls (0.30), 0.68 aisle, 0.40 worktop at the street wall, 0.80 accordion door
– Suite: 1.40 sliding panel → 1.52 two-leaf telescopic pocket pair (2.0 does not fit the 1.67 wall)
– Kids bath: WC re-centred, trough basin; tea corner: bench arm −0.15 and table 0.70
